The EncounterPRO EMR Workflow System

The EncounterPRO® EHR is a fully scalable enterprise electronic health record solution specifically designed for the ambulatory care family medicine practice. Designed by Family Physicians for Family Physicians the EncounterPRO EHR architecture is easily configurable for any size practice environment from solo provider to large multiple-location groups.

Built on a highly customizable workflow management system platform, the EncounterPRO EHR allows you to configure the application to the way you practice medicine. Many other EHR applications force you to change your work process to “fit” their application - but not the EncounterPRO EHR.

The EncounterPRO EHR has been designed from the ground up to be utilized in a touch screen environment, greatly improving the user experience and the efficiency of the solution.

Who Needs EncounterPRO?

- Do you want to realize cost savings and revenue improvements in your practice?
- Do you want your electronic health record software to be configured for your practice and individual user workflow preferences?
- Do you want seamless integration with your existing practice management system?

You Need EncounterPRO!

Top Ten Reasons That Family Physicians Choose EncounterPRO®

1. EncounterPRO users are Family Physicians. Of all EncounterPRO users 63% practice in a Pediatric setting and 26% practice in a Family Medicine setting — **Our Specialty is Your Specialty.**
2. Encounterpro Healthcare Resources, Inc. just celebrated our 10th year with the distinction of 14 national awards. For the past three years, winners of the prestigious HIMSS - Nicholas E. Davies Awards of Excellence in Ambulatory Care are EncounterPRO users.
3. EncounterPRO's **Virtual Office** enables users to identify where the patients are located, which provider the patient is scheduled to see, what tasks have been ordered for the patient, who is responsible for performing the task, and how long each task has been waiting — all in one color coded screen.
4. EncounterPRO's provides electronic prescription delivery through the **SureScripts Electronic Prescribing Network.**
5. EncounterPRO's vaccine tracking and management module, **VaxTrax**, includes interfaces to state immunization registries as well as parental approval signature capture directly in exam rooms. **VaxTrax** uses an algorithm based on the CDC guidelines to notify the provider when a patient is due for a specific vaccine dose and recommends the schedule for the remaining doses. **VaxTrax** works for patients who are on schedule as well as those who have fallen behind, and allows the provider to review the rules used in determining the recommended schedule.
6. EncounterPRO's customizable workflow management system automatically provide age/gender-specific templates for medical assistant and provider roles and includes: anticipatory guidance, diet & sleep histories, developmental guidelines, physical exams, and hearing & vision tests.
7. EncounterPRO's interface with LabCorp, Quest, and select regional laboratories automates the process of integrating laboratory results into the patient documentation solution.
8. EncounterPRO's coding tools allow practices to better manage, refine, streamline, and standardize their processes for ensuring accurate charge capture and visit level coding according to the 1997 E&M Documentation Guidelines.
9. EncounterPRO's built-in document management system coupled with seamless integrations with 25 practice management systems gets the paper and inefficiency out of the office.
10. EncounterPRO's ease of use and superlative training staff get you up and running — *fast!*
